

Patch Panels

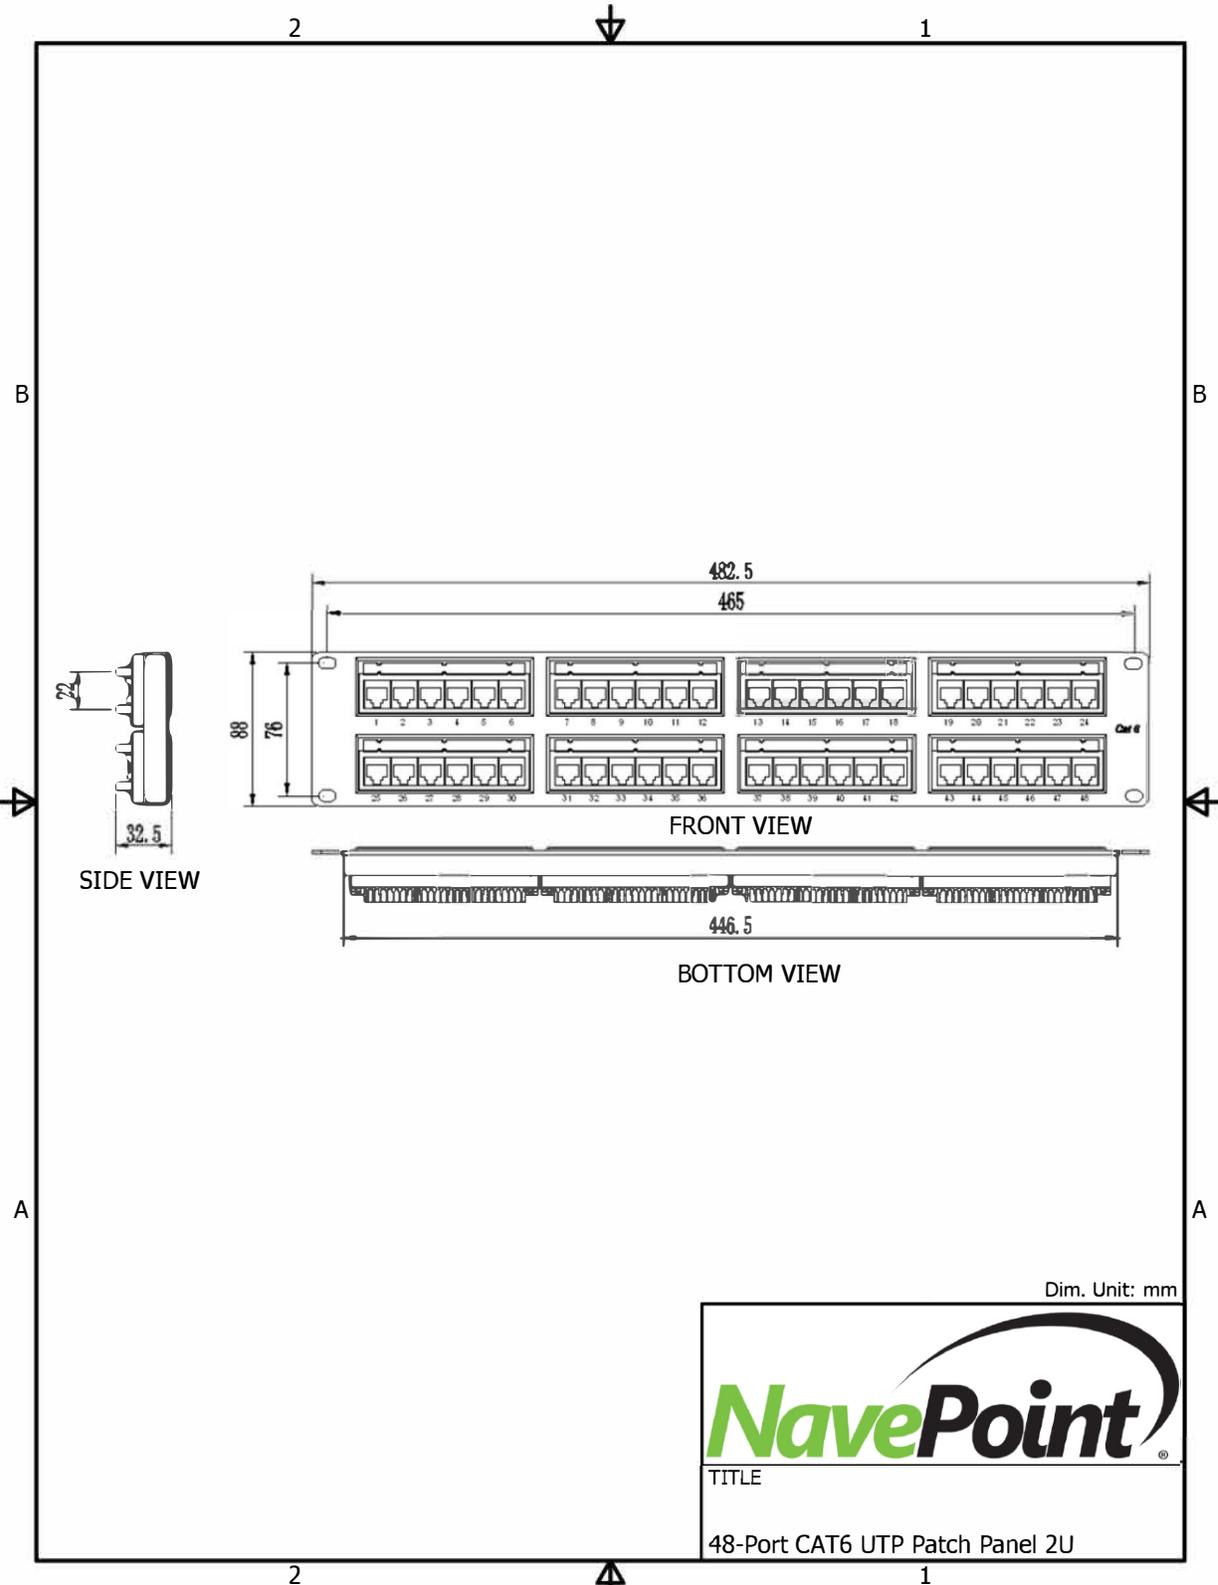

NavePoint offers a selection of CAT5e and Cat6 Patch Panels in rack-mount and wall-mount styles. Color-coded TIA/EIA 568A (international) and 568B (AT&T standard) wiring pattern meets CAT5e and CAT6 requirements and eases install. Bold port numbering (icon labels with plastic holders) makes for quick, clear port identification. Use with unshielded twisted pair (UTP) CAT5e or CAT6 network cable. Count on reliability with solid copper terminations for a solid connection. Compatible with Krone type punch down tools.
